Sometimes, there are no clue words in a story to tell how things are alike or how they are different. When there are no clue words, do the following:

- ★ Think about the people, places, or objects that you read about. Ask yourself, "How are they alike?"
- ★ Think about the people, places, or objects that you read about. Ask yourself, "How are they different?"

Read the first part of a letter that Deana wrote. Then answer the questions.

Camp Woodtrail

Dear Nadia,

I couldn't wait to write to you. I am having so much fun at Camp Woodtrail. This camp is so much better than the camp I went to last summer. Camp Reed was so boring. But Woodtrail is great. There is so much to do. I have already learned to sail a boat, paddle a canoe, and swim a mile. I even made a new friend. Her name is Pam. Don't worry, though. You are still my best friend.

Today, we spent time in the kitchen learning how to cook. We made bacon and eggs. Pam's eggs came out perfect, but mine came out just awful. Our counselor had to pull the fire alarm because I burned my eggs so badly!

5. Camp Woodtrail is
  - (A) bigger than Camp Reed.
  - (B) less fun than Camp Reed.
  - (C) more fun than Camp Reed.
  - (D) more boring than Camp Reed.
6. The fire alarm was pulled because
  - (A) bacon had burned.
  - (B) eggs had burned.
  - (C) there was a fire outside.
  - (D) there was a fire in the kitchen.
7. How were Pam's eggs different from Deana's eggs?
  - (A) Pam's eggs were tasty.
  - (B) Pam's eggs were fried.
  - (C) Pam's eggs were burned.
  - (D) Pam's eggs were perfect.
8. How are Pam and Nadia alike?
  - (A) Both go to Camp Woodtrail.
  - (B) Both are the same age.
  - (C) Both are Deana's friend.
  - (D) Both like cooking.

Read the next part of the letter that Deana wrote. Then answer the questions.

Tuesday night was the most fun I have ever had. We got to stay up late. We roasted marshmallows over the campfire, and watched a meteor shower. A meteor shower is when small rocks in space fly across the sky. Meteors were once part of comets. A comet is a huge ball of ice and rock. A meteor is just part of the comet. So, meteors are smaller than comets. But both meteors and comets make a streak across the sky. I counted nearly thirty meteors in all. Pam counted only ten.

I hope you are having a great time at baseball camp. Write to me soon. See you in two weeks.

Your friend,  
Deana

10. How are comets and meteors alike?

- Ⓐ Both are hard to see.
- Ⓑ Both make a streak across the sky.
- Ⓒ Both are about the same size.
- Ⓓ Both are seen every night.

11. How are Deana and Nadia alike?

- Ⓐ Both like baseball.
- Ⓑ Both are at camp.
- Ⓒ Both counted meteors.
- Ⓓ Both will return home in one week.

12. How was Tuesday night different from other nights?

- Ⓐ It was the longest ever.
- Ⓑ It was the happiest.
- Ⓒ It was the most fun.
- Ⓓ It was the worst ever.

12. Which of these is true?

- Ⓐ Pam enjoys watching meteors more than Deana.
- Ⓑ Pam counted more meteors than Deana.
- Ⓒ Pam counted fewer meteors than Deana.
- Ⓓ Pam knows more about meteors than Deana.

# Telephones Now and Then

by Rachelle Kreisman

Telephones help people speak to one another when they are apart. For more than a hundred years, nearly every telephone was a *landline*. A landline telephone is one that needs to be connected by a wire to a network of other telephones. Because of the wires, people could not take those telephones with them when they left their homes or offices.

What if you had to make a call while you were away from home? You had to find a pay phone. Pay phones are landlines found in public places. Many pay

phones are on the street. You can make a call from inside a glass or metal space called a phone booth. Once you are inside the booth, you put coins into a slot in the phone to make a call.

Telephones have seen a lot of progress. Today, many people carry cell phones. Cell phones do not need to be connected with wires. They can be used almost anywhere and can fit in an adult's hand.

Many cell phones sold today are smartphones. A smartphone is a cell phone that has lots of computer-style features. For example, people use smartphones to check e-mail and go on the Internet. And all that can be done using something small enough to carry in a pocket!

Name: \_\_\_\_\_ Date: \_\_\_\_\_

1. What is a landline telephone?

- A. a telephone that needs to be connected by a wire to a network of other telephones
- B. a telephone that can be carried around in your pocket and used anywhere
- C. a telephone that can be found in a public place

2. The article describes an example of a landline. What is one example of a landline?

- A. a cell phone
- B. a pay phone
- C. a smart phone

3. Pay phones are probably not used as much today as they were in the past.

What piece of evidence supports this conclusion?

(What is the text evidence?)

- A. People could not take landlines with them when they left their homes.
- B. Pay phones are landlines that can be found in public places.
- C. Many people today carry cell phones, which can be used almost anywhere.

4. What might be a reason that cell phones were invented?

- A. People wanted to be able to speak to one another when they were apart.
- B. People wanted to be able to make calls from their homes or offices.
- C. People wanted to be able to make calls away from home without finding a pay phone.

5. What is the main idea of this article?

- A. Cell phones are much less useful than landlines and pay phones.
- B. Telephones have been used for many years, and they have changed a lot over time.
- C. Telephones are used to keep people apart as much as possible.
