

# M9X & M9Y - Advanced Placement Statistics - Chapter 5 Review

January 6, 2020

Dear Students,

Please carefully study ALL of Chapter 5 of your textbook. You should fully understand all concepts and formulas listed on page 303 (except the very last three on transformations). There are additional important concepts we have introduced in this chapter that are not listed on page 303, such as *outliers*, *influential points* and the *MINITAB output*. You should ensure you have full understanding of all those as well.

Once you finish studying, proceed by answering the following problems: 5.38, 5.68, and 5.72

**Please note that the exam on Chapters 1 through 5 (with more emphasis on 5) will take place this Thursday, January 9th.** As always, your work should be uploaded electronically and not turned in by email or on paper.

Mr. Demopoulos & Ms. Erayil
