

Aristotle Questions 1

- 1) What does the third man argument show about Plato's Theory of the Forms?
- 2) Why does Aristotle wish to establish axioms or fundamental principles?
- 3) List and define Aristotle's three axioms, or Laws of Logical Thought. (You may define them in logical notation if you wish)
- 4) How is the Principle of Non-Contradiction "non-demonstrable" compared to special sciences?
- 5) Why is the Principle of Non-Contradiction the most secure of the three?
