## 5-2 <br> Practice <br> Form G <br> Perpendicular and Angle Bisectors

Use the figure at the right for Exercises 1 to 4.

1. What is the relationship between $\overline{L N}$ and $\overline{M O}$ ?
2. What is the value of $x$ ?

3. Find $L M$.
4. Find $L O$.

Use the figure at the right for Exercises 5 to 8.
5. According to the figure, how far is $A$ from $\overline{C D}$ ? from $\overline{C B}$ ?
6. How is $\overrightarrow{C A}$ related to $\angle D C B$ ? Explain.

7. Find the value of $x$.
8. Find $m \angle A C D$ and $m \angle A C B$.
9. Find $m \angle D A C$ and $m \angle B A C$.
$\qquad$
$\qquad$ Date $\qquad$

Algebra Find the indicated variables and measures.
10. $x, B A, D A$

11. $m, L O, N O$

12. $r, U W$

Writing Determine whether $A$ must be on the bisector of $\angle L M N$. Explain.
13.
