

Socratic Method Group Project Self Evaluation and Peer Review

Student Name (print):

Class Section (circle): 8A 8B 8C 8D 8E

Date Completed: 4/9/2024

Grade Type: Information is an input for Quiz Grades; completion is a Homework Grade

Instructions: Complete the following Self Evaluation and Peer Review.

1. List the members of your group (including yourself). Next to each group member, write an estimate of the percentage of the work done on the project contributed by that member. The total percentage should add up to 100.
2. Describe what each member of the group (including yourself) contributed to the project.
3. If you had to give each member of your group (including yourself) a grade based on the quality of their contributions and how well they worked as a group member, what would it be? (A-F). Explain your answers in detail with specific reference to their contributions.

4. Review the Rubrics for the Question Slides and the Dialogue Script (pages 11 and 12 in the Instructions). For this question's purposes, disregard the verbal presentation elements. What grade do you believe your group deserves for the Question Slides and Dialogue Script? Explain your answers.
5. Describe what you think the most difficult part of this project was. Explain why it was difficult and how you were able to accomplish it.
6. Describe what part of this project (or your cooperation in working on it) you think is the best. Explain your answer.
7. Later this week, we will begin presenting the projects. After your group is done presenting, your work will be put under verbal review and cross-examination by your peers and the teacher. You will be expected to give high quality and thoughtful responses to questions and comments. Briefly describe what questions/comments you expect to get and what your responses might be.

8. What, specifically, are your group's goals in today's class period? How do you plan to submit the project file at the end of today's class period?
9. (optional) If you have any other comments you feel the need to communicate about this project, you may do so here:
