

## **Classwork Discussion Questions:**

**The following questions were to be completed by students during class time. This is the submission form for Archie.**

1. According to you, is the value of a moral action more in the intention, the action, or the consequence? Why?
2. Should our moral attitudes be about personal codes we follow, or should they be entirely situational?
3. Is there such a thing as being “too flexible” with a moral rule - is every situation so different that the rules we make risk being useless?
4. Should we be tolerant or forgiving of unethical behavior? Think about the concept of punishment.
