

Due Monday, 10/26

Answer the questions on the next slide and upload to Archie. (I will give you time to work on this in class)

Layers of Earth Classwork

1. Draw the layers of Earth and label the following:
 - ✓ Names of the layers: crust, upper mantle, lower mantle, outer core, inner core
 - ✓ Which layers are solid, and which layers are liquid
2. Which layer has magma?
3. Where do convection currents happen?
4. Which layer is made of lithosphere/tectonic plates?
5. How do scientists study the layers of Earth if we can't dig into them?
