

Please print the two documents and bring it to our next class (Wednesday, October 28, 2020) to be paste it in the journals.

The Scientific Method

QUESTION

Ask a question.
What do you want to know?

RESEARCH

What do you already know? Research to find out more about your topic.

HYPOTHESIS

Predict what you think will happen.

EXPERIMENT

Test your hypothesis following your plan.

ANALYZE

Look at the data you collected. What were your results? What did you learn?

CONCLUSION

Explain your results. Was your hypothesis correct? What will you do next?

The Scientific Method

The Scientific Method is a set of steps that help scientists make observations and test out their theories so they can better understand the world.

What are the steps of the scientific method?
