

# **Project Base Learning**

After studying the **predator – prey and prey – predator relationships** (use the PP or textbook) chose one of each relationship and apply it into the Everglades ecosystem.

**Each IDENTIFIED relationship will consist of:**

1. explanation and description of each individual, diet, shelter, mating patterns, etc.
2. habitat description
3. photographs (4) of the relationship
4. geological location in Everglades
5. total of 300 words per relationship (600 in total)

**DUE: 9/27/23@ 23:59**
