

# Chapter 13

## Water Resources

## Chapter WARM-UP:

1. How is drinking water made naturally?
2. How is drinking water made in the water treatment facility?
3. Find large supplies of drinking water on each continent – provide specific location and name of the aquifer.
4. Where in a personal life the water is a necessity? Where in the agribusiness the water is a necessity?
5. How is water supply wasted?
6. Find three types of modern irrigation systems in developed countries and three types of not very efficient irrigation systems in developing countries.

## RESEARCH:

Research what happened to these water bodies in the last 100 years:

1. Colorado River
2. Lake Chad
3. Aral Sea
4. Ogallala aquifer
5. California Water Project
