## Science Homework: Plant Life Cycle

1. Plants make their own food.
  - a. True
  - b. False
2. Can plant life cycles be broken from extreme temperatures?
  - a. Yes
  - b. No
3. Which answer choice has the correct order of the plant life cycle.
  - a. seed, germination, young adult, adult, reproduction, death
  - b. seed, reproduction, young adult, adult, death, germination
  - c. reproduction, seed, adult, young adult, death, germination
  - d. death, reproduction, adult, young adult, germination, seed
4. Which answer best describes the life cycle of a plant.
  - a. the structure that it makes
  - b. the steps in its reproduction
  - c. the parts of it that form as it grows
  - d. the stages it goes through in its life
5. What is one way pollen can move?
  - a. Jumping
  - b. it can't
  - c. bees transfer it to other flowers

6. Pollen can be transferred through the wind.
- a. True
  - b. False
7. What is the first stage in a plant's life?
- a. germination
  - b. seed
  - c. young adult
  - d. seedling
8. The plant life cycle starts over when seeds from a plant end up in soil.
- a. False
  - b. True
9. Bees transfer pollen from flower to flower.
- a. True
  - b. False
10. Circle the image that shows germination:
