

Project chapter 2

Create a PP presentation containing

- five slides (cover does not count)
- five pictures
- 4 diagrams or tables or graphs
- Use one experiment where you will explain how scientific method works, apply it to the experiment of your choice
- **Topics to cover:** define matter, explain types of changes matter undergoes, source and types of energy, positive/negative feed back loop

Each student creates one PP, and explains scientific process on an example (all steps)
