

Hello all,

For homework tonight, please do Chapter 3 Review questions 1-16 on pages 56-57 in the book, writing out the complete sentences for each problem followed by the letter and corresponding term that best completes each statement. See an example below, and don't forget to upload a copy of your responses back up to archie. Let me know if you have any questions.

Best,

Ms. Fuhrman

Assume you think response "a." best completes the first problem; you would write:

1. A point whose latitude is 0° is located on the **a. North Pole**
