

**AMERICAN MATH HW  
WEEK OF 6JAN to 10JAN**

**Due Date:** 01/12 by midnight

The HW this week is **OPTIONAL (not mandatory)**. This week's HW is an extra credit assignment. So, only the students who would like to make use of this opportunity need to do this.

The goal for the extra credit assignment for this week is to use this as **an opportunity to upgrade your grade for any/all classwork (CW) assignments to up to 100 points**. Classwork accounts for 20% of your entire grade.

-----

Follow the below steps:

1. Go to [ixl.com](http://ixl.com) on safari or chrome (Do not go to the IXL app)
2. Use below information to login:
  - a. IXL username - your archie username@archimedeanacad
  - b. IXL password - archie199
3. Go to My IXL → Quizzes
4. Scroll down and click on "Show more". You will see a list of all the assignments taken on IXL so far.

For this week's extra credit assignment focus only on the below from the list:

- Look at the first column for assignment title. Only the ones that are Classwork/CW are the ones to look at.
- Look at the third column for dates of assignment. Focus only on the assignments that are dated after 18Oct because that is when the second quarter started.
- Choose the Classwork (CW) assignments that you would like to upgrade your grade for.
- Once, you have chosen your assignments, click on the first one. At the top right corner, check on "show missed questions only".

**For the extra credit, you need to work ONLY on the missed questions.**

### **How to submit your extra credit assignment?**

1. On a loose sheet of paper, put the assignment title from IXL that you are working on. (Do not do this in your journal)
2. Under that, put the number of the first problem from the assignment that you missed. (Make sure that the problem number matches the problem number on the IXL assignment)
3. Solve that problem completely showing all the steps and your work (Only final answer will not be accepted as the solution. I want to see the process of solving). You can use your notes, parents' help, online resources, etc. to get help. If you do not know how to do the problem, bring it to class and come and talk to me to get help.
4. If you are done with missed questions from one assignment, put the title for the next assignment you would like to work on.
5. Under that, put the number of the first problem from the assignment that you missed. (Make sure that the problem number matches the problem number on the IXL assignment)
6. Solve that problem completely showing all the steps and your work (Only final answer will not be accepted as the solution.
7. Continue this for any/all CW assignments you have chosen to work on.
8. Finally, scan these pages in the right order to make one SINGLE document and upload on Archie.

***Note: If you are failing a test/quiz in this quarter and would like to work on upgrading your grade to a maximum of "C". Please come and discuss that with me, and we can make a plan together.***
