

Hello all,

Please complete the Chapter 3 Practice worksheet that we started today in class. You can download it from the Resources page on Archie. In addition, please read Chapter 3, Lessons 3 and 4, paying particular attention to those forces that shape and affect Florida's landforms and coastlines. Start your reading notes entries for these sections by writing the Word Wall definitions. I will follow up to prompt you with exactly which of the in-text questions I'd like you to answer in your next assignment and after we start going over these sections in class. Let me know if you have any questions.

Best,

MF
