

Lesson**6.1****Extra Practice**

Identify the terms, coefficients, and constants in the expression.

1. $3 + c + e$ 2. $5m + 9$ 3. $3p^2 + 7$

Write the expression using exponents.

4. $c \cdot c \cdot c \cdot c$ 5. $8 \cdot p \cdot p \cdot p \cdot p \cdot p$ 6. $12 \cdot d \cdot d \cdot d \cdot f \cdot f$

Evaluate the expression when $c = 4$, $d = -6$, and $e = \frac{1}{2}$.

7. $7d$ 8. $c + d$ 9. $15 - d$
10. $-\frac{4}{7} \cdot e$ 11. $\frac{24}{c}$ 12. $9 + e$
13. $16 \div c$ 14. $3.25d$ 15. $\frac{60}{d}$

Evaluate the expression when $m = -5$ and $n = 8$.

16. $4m - 4.6$ 17. $4n - \frac{1}{10}m$ 18. $\frac{6m}{n - 3}$

19. Your friend evaluates the expression when $m = 10$. Is your friend correct? Explain your reasoning.

$$\begin{aligned} 3m - 6 &= 3 \cdot 10 - 6 \\ &= 3 \cdot 4 \\ &= 12 \end{aligned}$$

20. Twenty-five students go to lunch. Pizza costs \$3 and sandwiches cost \$2. Twelve students buy pizza. What is the total amount of money spent on sandwiches?
21. Each student in your class must do 14 homework problems. There are 23 students in the class. How many problems will your teacher have to grade?
22. A summer job pays \$5 per hour.
- You work for 12 hours. How much do you make?
 - After working 24 hours, do you have enough money to buy an MP3 player that costs \$100? Explain your reasoning.
23. You can read 52 pages per hour.
- You read for an hour and a half. How many pages have you read?
 - You must read 130 pages for homework. Can you complete the assignment in two hours? Explain your reasoning.
