## NO HOMEWORK THIS WEEK.

I am excited to share that our school will be participating in the Fairchild Challenge this year! As part of the project, we will be creating a garden using recycled materials to promote sustainability and creativity. To make this possible, we kindly ask for your help by sending in empty cans, large plastic bottles, Clorox bottles, detergent bottles, milk gallons, or any other items you think could work for this project. Your contributions will help bring this garden to life while teaching our students the importance of recycling and environmental responsibility. Thank you for your support!
