

Hello all,

Please read **Chapter 8, Lesson 2** and answer **Lesson Review questions 1-6 on page 167** in the eBook, and please do the following problem:

Use the conversion factor $F = \frac{9}{5}C + 32$ to a) **convert 60° C to ° F** and b) **convert 41° F to ° C**

For homework, remember to start a new document (MS Word, Google Docs, GoodNotes, etc.), answering in complete sentences. For multiple choice questions, this includes rewriting the original questions as well as the **letter and complete response** for the correct answer. For questions a) and b) above, show your calculation. Please remember to include the following information at the top of the document:

Assignment

There could be a **short reading quiz tomorrow or Friday** for which you might be allowed to use your notes, so I'd suggest making sure your notebook entries are complete and easy for you to understand. Let me know if you have any questions.

Best,

MF

and do the associated notebook entry, including the **Word Wall definitions and answer all seven prompt questions on page 150, answering in complete sentences.** As a reminder, notebook entries go in your **science folder** and are not to be turned in via archie. Also prepare yourself for a possible reading quiz on 7.1 material. Let me know if you have any questions.
