

Name: _____ Section: _____

Homework

Greetings Scholar and Parents. We have transitioned fully over to the online platform of BigIdeas. As a reminder, the USERNAME for all users is their ArchieUsername@archimedean.org. Please change these passwords appropriately.

Extra Practice

Additional practice for the daily lessons is available on IXL. To access extra practice, please have your child login into IXL. Under the **“What should I work on”** section, scholars will find Teacher Assigned Lessons. From there, you will see a list of lessons reinforcing the daily skills.

- Review year’s previous IXL assignments. Look at all homeworks related to:
- Area & Perimeter with Decimals and Fractions
- Adding Fractions & Mixed Numbers
- Subtracting Fractions & Mixed Numbers
- Multiplying & Dividing Fractions & Mixed Numbers

Notes

This week, all required BigIdeas Practices should be done by Sunday, May 11th. Students must prove and show all their work in the provide space. Scholars should use a separate sheet of paper if they need additional space. Failure to show work or packets submitted after the due date will result in a lower grade. If a scholar struggles with a lesson, they can review the daily lesson on HMH. Please feel free to contact me with any questions or concerns at peter.vanegas@archimedean.org.

<u>Monday</u>	May 5 th	BigIdeas: Dividing with Fractions
