

Ch. 3 Lesson 4 Review

1) What is the landform in the diagram labeled A? FSAS SC.6.E.6.2

- cirque
- moraine
- kettle
- arête

2) If Earth's glaciers were to melt, what would be the most likely effect in Florida? FSAS SC.6.E.6.2

- coastal flooding
- till deposition
- increased acid rain
- an outwash plain

3) What landform would you **NOT** expect to find in Florida? FSAS SC.6.E.6.2

- dune
- delta
- river meander
- kettle lake

4) Which is *not* an example of mass wasting?

- flood
- creep
- slump
- landslide

Ch. 3 Lesson 4 Review

- 5) Walter and Gene drove out to a state park where the land is hilly. They noticed that many of the fence posts along the way were all leaning in the same direction. At the park, they observe that many of the trees on the hills were bent and leaning as well. Gene and Walter were seeing evidence of what type of mass wasting?
- creep
 - slump
 - rockfall
 - mudflow
