TEST 12.17.2025 (Multiplication of 10, 5, 2 & 4, Numbers in Greek)

Λημνος

This week students will review numbers from 0 to 100, along with their Greek written forms and pronunciation. We will revisit the concept of repeating patterns, recognizing and creating pattern sequences in order to understand multiplication concepts. Finally, we will revise multiplication by 10 and 5, and we will move into multiplication of 2 and 4, solving related exercises and applying the new multiplication skills in class practice.

Dear Parents, Your children have been practicing similar exercises in class. 1st exercise focuses on the multiplication table of 10 (copying, solving, and understanding). 2nd exercise focuses on the multiplication table of 5 (copying, solving, and understanding). 3rd exercise focuses on multiplication terminology in the Greek language. Each exercise includes vocabulary and examples. Kindly remind them to bring the homework completed on Thursday 12/11/2025 in their blue folder. Please, encourage your child to complete the assigned homework. If you have any questions or concerns, please, contact me through email at: stamatios.mavrogeorgis@archimedean.org.

Thank you,

Mr Stamatios Mavrogeorgis
