Quiz 01.14.2026 (Multiplication of 3 & 6)

Σάμος

This week students will review numbers from 0 to 100, along with their Greek written forms and pronunciation. We will revisit the concept of repeating patterns, recognizing and creating pattern sequences in order to understand multiplication concepts. Finally, we will revise multiplication by 3 and 6, solving related exercises and applying the multiplication skills in class practice in order to be ready for the Quiz.

Dear Parents, Your children have been practicing similar exercises in class. 1st exercise focuses on the multiplication table of 3 & 6 (copying, solving, and understanding). 2nd exercise focuses on finding and circling the multiples of 3 and 6. 3rd exercise focuses on multiplication concept as a repeated addition. Kindly remind them to bring the homework completed on Thursday 01/15/2026 in their blue folder. Please, encourage your child to complete the assigned homework. If you have any questions or concerns, please, contact me through email at: stamatios.mavrogeorgis@archimedean.org.

Thank you,

Mr Stamatios Mavrogeorgis
