## Quiz 02.04.2026 Multiplication of 8 and 9

This week, students will review numbers from 0 to 100 in Greek, focusing on both their written form and pronunciation. We will use this number knowledge to support mental math fluency, specifically revisiting multiplication facts from 1 through 10.Throughout the week, students will engage in pattern recognition and creation activities, connecting visual and numeric patterns to multiplication concepts. On Wednesday, we will hold a multiplication quiz on the 8 and 9 times tables

Dear Parents,

Your children have been practicing similar strategies and exercises in class. This week's homework is a revision of multiplication tables using mental math techniques, focusing on previously taught facts.

- Exercise 1 helps students understand the multiplication of 3 as (1 + 2) and of 4 as (2 + 2).
- Exercise 2 focuses on breaking down multiplication of 6 as (5 + 1) and of 7 as (5 + 2).
- Exercise 3 reinforces multiplication of 8 as (10-2) and 9 as (10-1).

These exercises aim to strengthen mental math strategies through decomposition of numbers and pattern recognition.

Kindly remind your child to bring the completed homework on Thursday, 02/05/2026, in their blue folder.

Please encourage your child to complete the assigned work independently, as it builds fluency and confidence in multiplication. If you have any questions or concerns, feel free to reach out via email at:
