Test 02.17.2026 Multiplication of 1 to 10

This week, students will review numbers from 0 to 100 in Greek, focusing on both their written form and pronunciation. We will use this number knowledge to support mental math fluency, specifically revisiting multiplication facts from 1 through 10. On Tuesday 02.17.2026, we will hold a multiplication Test on the 1 to 10 times tables

Dear Parents,

This week's homework focuses on reviewing the Greek numbers from 0 to 100—both their written form and pronunciation—as well as reinforcing multiplication fluency from 1 to 10 in preparation for Tuesday's multiplication test (02/17/2026).

The exercises are structured as follows:

- Exercise 1 helps students identify the multiples that come before and after a given product in each times table.
- Exercise 2 has students solve multiplication facts and write out the full equations in Greek, combining vocabulary, computation, and language.
- Exercise 3 reinforces mental strategies by decomposing numbers: 3 as $(2 + 1)$, 4 as $(2 + 2)$, 6 as $(5 + 1)$, 7 as $(5 + 2)$, 8 as $(10 - 2)$, 9 as $(10 - 1)$.

These exercises are designed to strengthen number sense, pattern recognition, and mental math fluency in both languages.

Kindly remind your child to bring the completed homework on Thursday, 02/12/2026, in their blue folder.

Please encourage them to complete the work independently, as it supports confidence and mastery in multiplication
