dorlaine.quintana@archimedean.org

REMINDERS

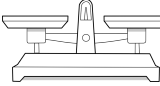

- No Homework
- TEST Friday 02/27
- iPads FULLY CHARGED

TIME TO REVIEW

Vocabulary

- **Properties of Matter**- color, texture, size, flexibility, and state, (solid, liquid, and gas)
- **solids**- They have a definite shape and volume. 
- **Liquids**- They have a definite volume and don't have a definite shape. They take the shape of the container they are in. 
- **Gasses** - They have no fixed shape or size and spread out to fill any container it is in. 
- **Physical changes in matter** - when matter changes how it looks, feels, or its shape, but it is still made of the same stuff.
- **Chemical Changes** - when matter turns into a brand new substance that cannot easily go back to what it was before.

MEASURING TOOLS

- **Thermometer** - It is used to measure temperature. 
- **Balance** - It is used to measure mass/weight of objects. 
- **Ruler** - It is used to measure length and width. 
- **Measuring Cup** - It is used to measure liquids.
