Dream in Green - Green School Challenge Waste Reduction and Recycling

Title: Trash Talk: Turning Waste into Work

Dear Parents and Students,

We are excited to have began a new class project titled "Trash Talk: Turning Waste into Work!". This engaging activity will help students explore how different types of waste decompose and how this connects to real-world environmental careers.

Project Objective: Students will investigate how materials such as food scraps, paper, and plastic break down over time. They will also learn about important careers like composting specialists, landfill managers, and environmental scientists.

Activity Mini Poster Due Monday 04/20: Each student will choose a career related to waste management and **create a mini-poster** (dimensions 8.5 x 11 or 5.5 x 8.5 inc) includes:

- The job title
- One tool or skill this job uses
- One reason why the job is important for the Earth
- A drawing of themselves in that role
- Students will present their posters to the class

Sincerely,
Ms. Yiouli
