First Grade American Math Homework #32

We are so proud of how hard our scholars have been working! This week, we will review all First Grade Math topics to reinforce everything they have learned and build their confidence as we finalize our preparation for the FAST PM3 assessment next week.

Scholars have access to an **IXL skill plan** for additional practice and reinforcement of the daily lesson. It provides specific lessons divided by chapter that will help scholars prepare for PM3. You can work both in IXL lessons I have assigned, and under the IXL skill plan.

As a reminder, we have a new IXL competition for April! It lasts until May 6th, be sure your scholars are practicing on the IXL skill plan, and in from your teacher.
